Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner and Mr. Doerr discussed the limitation of the image of compressor data including compressor identification data and compressor configuration data and whether Center et al disclosed the wholesale transmission and receive of the image by the control block. The examiner made an argument that an image would not have to necessarily be a complete image of all the data. Mr. Doerr noted that he was trying to bring out in the claim that it was the entire image by setting forth that the image had the identification and configuration data types. The examiner stated that he would further consider this and also whether Center et al would teach doing such actions on a complete image.
